

Now Readily Biodegradable

Leak Detection Just Got Greener

ecoGLO™

READILY BIODEGRADABLE UV DYE

ECO-GLO under violet light LED

ECO-GLO™ sets a new industry standard in leak detection. It's the **first oil dye on the market that's readily biodegradable and system safe.**

Designed for *closed-loop*, oil-based fluid systems, ECO-GLO™ glows vivid green under UV light and delivers high performance without compromising equipment integrity. It is ideal for preventive maintenance in forestry, mining, marine, and more.

First of Its Kind
The only biodegradable oil-based UV dye

Readily Biodegradable
Breaks down quickly in the environment

High-Performance Formula
Same brightness, greener impact

Eco-Site Ready
Ideal for forestry, marine, mining and more
